

Features

- Swivadapt allows positioning of instrument throughout 360 deg and safe connection of dissimilar instrument and process threads.
- Metal to metal seal between instrument adaptor and process body. Suitable for high pressure/temperature applications.
- Maximum working pressure 700 bar (10000 psi) higher pressures available on request.
- Hydrostatically tested to 1.5 times maximum working pressure.
- Has trace code on body with material certificates
- available for all wetted parts on request.
- Available in a variety of materials, stainless steel, monel etc.
- Can be supplied to NACE MR-01-75 latest edition.
- Pressure joint can be made, broken and remade and still retain full pressure seal integrity.
- Bleed hole facility gives warning of incorrect mating of cone faces whilst mechanical integrity is still maintained.
- Process flow path has only two wetted parts and is crevice free.
