Valve Colour Coding

### APPLICATION

#### Using The 2-Valve Manifold

In normal operation the "isolate" valve is open while the "vent" valve is closed. To remove the instrument, first close the "isolate" valve, then open the "vent" valve to relieve pressure upstream of the "isolate" valve.

#### Calibration Options

By connecting a calibration gauge to the vent port, it is possible to check the calibration of the instrument without removing it from the installation.
