

Fluidic are an ISO9001:2015 accredited instrumentation company. We have 2 UK offices, each with experienced engineers able to help with almost every instrumentation application.

Along with instrument supply, we offer calibrations for the following parameters:

- Temperature (wet and dry bath) from $-30...+160\text{degC}$
- Relative Humidity from 10...90%RH
- Controllers, recorders and data acquisition systems via RTD or 4-20mA signal injection/simulation
- Carbon Dioxide Transmitters, including ppm and % type measurements
- Low pressure ("pascal") type instruments
- Medium pressure transmitters/switches/gauges up to 25barg

We can carry out calibration in our workshop or onsite at your premises as preferred. Please contact either office on the contact details bottom right to discuss your application.
