

A MODERN COST-EFFECTIVE ALTERNATIVE TO TRADITIONAL DIAL GAUGES

DM665TM

The DM665TM accepts Pt100 or thermocouple temperature sensors, and displays the temperature in °C or °F on a large-format 6-digit LCD display.

This makes it the ideal alternative to bi-metal thermometers, delivering greater accuracy, definitive read-outs, and superb visibility.

- Easily push-button programmable
- Stainless steel housing
- Large-digit display
- Universal input
- Accepts multiple battery types
- Battery life can be extended up to 5 years
- Max and Min temperature readings can be displayed using the two front panel buttons
- User offset by $\pm 10^{\circ}\text{C}$ or $^{\circ}\text{F}$, allowing compensation for any temperature probe error

Go digital
