

Viewing Heads S55XBE

Single channel UV+IR Viewing Head to be used with P522/P531/P532 Signal Processors.

Overview

S55XBE series viewing heads are used with P522, P531 and P532 signal processors. Multiple sensor options of IR, UV and IR+UV offer flexibility to meet a wide array of applications. The processors are not adversely affected by X-Rays and Gamma rays during operation making them ideal for monitoring all fuel flames and single or multiple burners firing multiple fuels.

Features & Benefits:

- Multiple models (IR+UV, IR only and UV only) offer application flexibility
- All models include electronic check (no mechanical shutter) for self-check of the system
- Numeric two-digit display for each sensor on the back of the viewing head provides UV and IR flame count
- Quick disconnect cable (order separately) for non-PF models. PF models provided with factory installed cable
- Mountable in any orientation
- Includes imbedded temperature sensor
