

IMMERSION TUBE BURNERS

TUBE-O-FLAME®

Maxon TUBE-O-FLAME® Burners are nozzle mixing, gas-fired, refractory-less burners specifically designed for firing into an immersion tube.

Overview

MAXON's TUBE-O-FLAME® industrial burners provide clean, low NOx heating for tube firing. The TUBE-O-FLAME® burns most fuel gases inside an array of tubes to provide reduced fuel TUBE-O-FLAME® consumption and better process response. The low horsepower requirements reduce operating costs, and produce clean combustion with outstanding reliability.TUBE-O-FLAME® natural gas burners ensure improved performance for industrial washers, dip tanks, water-bath heaters, solution tanks, and asphalt tanks.

Features & Benefits:

- Nozzle-mixing, refractory-less burners for tube firing
- Burns any clean, low pressure fuel gas
- Increases heat transfer efficiencies with long, swirling flame pattern
- Promotes faster bring-up times with 20:1 turndown capabilities
- Easy installation due to flange-mounted compact design
- Simple start-up and field adjustments
- Low horsepower requirements reduce initial and operating costs
- Produces low levels of NOx in combustion products
- Generates less noise than open-port tube firing
