# **Technical Information**

# STF700 SmartLine Flange Mounted Level Specification 34-ST-03-103, March 2024

# Introduction

Part of the SmartLine® family of products, the STF700 is a flange-mounted level transmitter suitable for monitoring, control and data acquisition featuring piezoresistive sensor technology. STF700 transmitters may be directly mounted onto a tank flange and are offered with a variety of tank connections including various flush and extended diaphragm configurations. STF700 offers high accuracy and stability over a wide range of level applications. The SmartLine family is also fully tested and compliant with Experion ® PKS providing the highest level of compatibility assurance and integration capabilities. SmartLine easily meets the most demanding application needs for pressure measurement applications.

# **Best in Class Features:**

- Accuracies up to 0.05% of span standard & 0.04% of span optional.
- Stability up to 0.02% of URL per year for 10 years.
- Automatic static pressure & temperature compensation.
- Rangeability up to 100:1.
- Response times as fast as 100ms.
- Multiple local display capabilities.
- External zero, span, & configuration capability.
- Polarity insensitive electrical connections.
- Comprehensive on-board diagnostic capabilities.
- Integral Dual Seal design for highest safety based on ANSI/NFPA 70-202 and ANSI/ISA 12.27.0.
- World class overpressure protection.
- Full compliance to SIL 2/3 requirements.
- Modular design characteristics.
- Available with additional 4-year warranty.

# La contraction of the second s

#### Span & Range Limits:

|        | URL          | LRL          | Min Span     |
|--------|--------------|--------------|--------------|
| Model  | inH₂O (mbar) | inH₂O (mbar) | inH₂O (mbar) |
| STF724 | 400 (1000)   | -400 (-1000) | 4.0 (10.0)   |
| STF72F | 400 (1000)   | -400 (-1000) | 4.0 (10.0)   |
| Model  | psi (bar)    | psi (bar)    | psi (bar)    |
| STF732 | 100 (7.0)    | -100 (-7.0)  | 1 (0.07)     |
| STF73F | 100 (7.0)    | -100 (-7.0)  | 1 (0.07)     |

# **Communications/Output Options:**

- 4-20mA
- Honeywell Digitally Enhanced (DE)
- HART<sup>®</sup> (version 7.0)

All transmitters are available with the above listed communications protocols.

# www.fluidic-ltd.co.uk

# Description

The SmartLine family pressure transmitters are designed around a high performance piezo-resistive sensor. This one sensor actually integrates multiple sensors linking process pressure measurement with on-board static pressure (DP Models) and temperature compensation measurements. This level of performance allows the ST 700 to replace most competitive transmitters available today.

# Indication/Display Option

The ST 700 modular design accommodates a standard alphanumeric LCD display or a unique advanced graphics LCD display with many unparalleled features.

#### **Standard LCD Display Features**

- Modular (may be added or removed in the field).
- Supports HART protocol variant.
- 0, 90,180, & 270 degree position adjustments.
- Four configurable screens.
- Standard and custom measurement units available.
- Display calculated flow (square root) value in addition to analog output signal.
- 2 Lines 6 digits PV (9.95H x 4.20W mm) 8 Characters.
- Write protect Indication.
- Built-in Basic Device Configuration through Internal or External Buttons – Range/Engineering Unit/Loop Test /Loop Calibration/Zero /Span Setting.
- Multiple language capabilities (EN, RU).

# **Advanced Graphics LCD Display Features**

- Modular (may be added or removed in the field).
- 0, 90, 180, & 270-degree position adjustments.
- Standard and custom measurement units available.
- Up to eight display screens with 3 formats are possible.
- Large PV with Bar Graph or PV with Trend Graph.
- Configurable screen rotation timing (1 to 30 sec).
- Display calculated flow (square root) value in addition to analog output signal.
- Unique "Health Watch" indication provides instant visibility of diagnostics.
- Multiple language capability (EN, DE, FR, IT, ES, RU, TR, CN, & JP).

# **Diagnostics**

SmartLine transmitters all offer digitally accessible diagnostics which aid in providing advanced warning of possible failure events minimizing unplanned shutdowns, providing lower overall operational costs.

# **System Integration**

 SmartLine communications protocols all meet the most current published standards for HART/DE.

- Integration with Honeywell's Experion PKS offers the following unique advantages.
  - Tamper reporting
  - o FDM Plant Area Views with Health summaries
  - All ST 700 units are Experion tested to provide the highest level of compatibility assurance.

# **Configuration Tools**

# Integral Two Button Configuration Option

Suitable for all electrical and environmental requirements, SmartLine offer the ability to configure the transmitter and display via three externally accessible buttons when either display option is selected. Zero/span capabilities are also optionally available via these buttons with or without selection of a display option.

#### Handheld Configuration

SmartLine transmitters feature two-way communication and configuration capability between the operator and the transmitter. All Honeywell transmitters are designed and tested for compliance with the offered communication protocols and are designed to operate with any standards compliant handheld configuration device, such as Honeywell Versatilis Configurator.

## **Personal Computer Configuration**

On a personal computer or laptop, Honeywell Field Device Manager (FDM) Software and FDM Express can be used for managing HART device configurations.

# **Modular Design**

To help contain maintenance & inventory costs, all ST 700 transmitters are modular in design supporting the user's ability to replace meter bodies, add indicators or change electronic modules without affecting overall performance or approval body certifications. Each meter body is uniquely characterized to provide in-tolerance performance over a wide range of application variations in temperature and pressure and due to the Honeywell advanced interface, electronic modules may be swapped with any electronics module without losing in-tolerance performance characteristics.

## **Modular Features**

- o Meter body replacement
- Exchange/replace electronics/comms modules\*
- Add or remove integral indicator\*
- Add or remove lightning protection (terminal connection)\*
- \* Field replaceable in all electrical environments (including IS) except flameproof without violating agency approvals.

With no performance effects, Honeywell's unique modularity results in *lower inventory needs and lower overall operating costs.* 

# **Performance Specifications**

Total Performance (% of Span):

# Total Performance = +/-

# (Temp Effect)<sup>2</sup>+ (Static Line Pressure Effect)<sup>2</sup>

**Total Performance Examples (for comparison):** standard accuracy 5:1 Turndown, up to 50 °F shift & up to 300 psi Static Pressure

STF724 @ 80in H<sub>2</sub>O: 0.273% of span STF72F @ 80in H<sub>2</sub>O: 0.166% of span STF732 @ 20 psi: 0.477 % of span STF73F@ 20 psi: 0.138% of span

# √(Accuracy)<sup>2</sup> +

.

## **Typical Calibration Frequency:**

Calibration verification is recommended every two (2) years.

#### Notes:

- 1. Terminal based Accuracy Incudes combined effects of linearity, hysteresis and repeatability. Analog output adds 0.005% of span.
- 2. For zero based spans and reference conditions of 25°C (77°F).0 psig static pressure, 10 to55% RH.

<sup>4</sup> Ambient Temperature for DN PN40 is -10 to 50°C [14 to 122 F]

<sup>5</sup>MAWP applies for temperature range -40 to 125°C. However, Static Pressure Limit is de-rated to 3,000 psi from -26°C to -40°C.

Use of graphite o-rings de-rates transmitter to 3,625 psi. Use of adaptor with graphite o-rings de-rates transmitter to 3,000 psi.

<sup>6</sup> Consult factory for MAWP of ST 800 transmitters with CSA approval.

# Performance Under Rated Conditions – All Models

| Parameter   | Description   |                  |                           |                               |  |

# Materials Specifications (see model selection guide for availability/restrictions with various models)

| Parameter                              | Description  |
|--|--|
| Barrier Diaphragms Material            | 316L SS, Hastelloy <sup>®</sup> C-276 <sup>2</sup> , Monel <sup>®</sup> 400 <sup>**3</sup>   |
| Process Head Material                  | 316 SS <sup>4</sup> , Carbon Steel (Zinc-plated) <sup>5</sup> , Hastelloy C-276* <sup>6</sup> , Monel 400 **7  |
| Vent/Drain Valves & Plugs <sup>1</sup> | 316 SS <sup>4</sup> , Hastelloy C-276 <sup>2</sup> , Monel 400 <sup>7</sup>  |
| Gasket Ring Material (Wetted)          | 316/316L SS, Hastelloy <sup>®</sup> C-276* <sup>2</sup> , Monel <sup>®</sup> 400** <sup>3</sup>  |
| Extension Tube Material                | 316 SS⁴  |
| Head Gaskets                           | Glass-filled PTFE standard. Viton <sup>®</sup> and graphite are optional.  |
| Meter Body Bolting                     | Carbon Steel (Zinc plated) standard. Options include 316 SS, NACE A286 SS bolts, Monel K500, Super Duplex and B7M.   |
| Optional Adapter Flange and<br>Bolts   | Adapter Flange materials include 316 SS <sup>4</sup> , Hastelloy C-276 <sup>6</sup> and Monel 400 <sup>7</sup> . Bolt material for flanges is dependent on process head bolts material chosen. Standard adaptor seal material is glass-filled PTFE. Viton and graphite are optional. |
| Mounting Flange                        | Flush or Extended Diaphragm:   |
| STF724, STF732                         | Zinc Chromate plated Carbon Steel <sup>5</sup> , 304 SS, or 316 SS <sup>4</sup> .  |
| STF72F, STF73F                         | 316L SS (NOTE: Mounting Flange is process wetted.)   |
| Fill Fluid                             | Silicone 200, CTFE, NEOBEE M-20 or Silicone 704  |
|  | Pure Polyester Powder Coated Low Copper (<0.4%) – Aluminum.  |
| Electronic Housing                     | Meets Type 4X / IP66 / IP67. All stainless-steel housing is optional.  |
|  | Cover O ring material: Silicone.   |
| Mounting                               | See Figure 3 for typical flange mounting arrangement.  |
| Process Connections                    |  |
| All Models                             | Process Head: 1/4-inch NPT; 1/2-inch NPT with adapter and DIN, standard options.   |
| STF724, STF732                         | Flange: 2, 3 or 4-inch Class 150 or 300 ANSI; DN50-PN40, DN80-PN40 or DN100-<br>PN40 DIN flange.<br>Extended Diaphragm: 2, 4, or 6 inches (50, 101, 152 mm) long.  |
| STF72F, STF73F                         | 2 or 3-inch, Class 150 ANSI flange.  |
| Wiring                                 | Accepts up to 16 AWG (1.5 mm diameter).  |
| Dimensions                             | See  |
|  | Figure 4, Figure 5 & Figure 6  |
| Net Weight                             | STF72F, STF73F:14-19 pounds (6.4 - 8.7Kg) with Aluminum Housing  |
| -                                      | STF724, STF732: 18-32 pounds (8.2 - 14.5Kg) with Aluminum Housing  |

<sup>1</sup> Vent/Drains are sealed with Teflon<sup>®</sup>

<sup>2</sup> Hastelloy C-276 or UNS N10276.

<sup>3</sup> Monel 400 or UNS N04400.

 $^4\,$  Supplied as 316 SS or as Grade CF8M, the casting equivalent of 316 SS. <sup>5</sup> Carbon Steel heads are zinc-plated and not recommended for water service due to hydrogen migration. For that service, use 316 stainless steel wetted Process Heads.

<sup>6</sup> Hastelloy C-276 or UNS N10276. Supplied as indicated or as Grade CW12MW, the casting equivalent of Hastelloy C-276.

<sup>7</sup> Monel 400 or UNS N04400. Supplied as indicated or as Grade M30C, the casting equivalent of Monel 400

\* Flush design only.

\*\*Flush or pseudo-flange design.

# **Communications Protocols & Diagnostics**

# **HART Protocol**

# Version:

HART 7

# Honeywell Digitally Enhanced (DE)

DE is a Honeywell proprietary protocol which provides digital communications between Honeywell DE enabled field devices and Hosts.

# **Standard Diagnostics**

ST 700 top level diagnostics are reported as either critical or non-critical and are readable via the DD/DTM/FDI tools or integral display. All critical diagnostics will appear on the Advanced and Standard integral displays, and some non-critical diagnostics will also appear on the Advanced integral display. Some of the diagnostics are listed below.

# **Critical Diagnostics**

- Electronics Module Fault.
- Meter body Memory Corruption.
- Config Data Corruption.
- Electronics Module Diagnostics Failure.
- Meter body Critical Failure.
- Sensor Communication Timeout.

# **Non-Critical Diagnostics**

- Electronics Module Fault.
- Display Failure.
- Electronics Module Comm Failure.
- Meter body Excess Correct.
- Sensor Over Temperature.
- Fixed Current Mode.
- PV Out of Range.
- No DAC Compensation.
- Tamper Attempt Alarm.

Refer to the product user manual for comprehensive list of diagnostics and details.

Model Selection Guide 34-ST-16-103, Issue 30

#### Instructions

- Select the desired Key Number. The arrow to the right marks the selection available.
- Make one selection from each Table (I, II and IX) using the column below the proper arrow. •
- A(•) denotes unrestricted availability. A letter denotes restricted availability. ٠
- Restrictions follow Table IX. •

<sup>1</sup> Carbon Steel heads are zinc-plated and not recommended for water service due to hydrogen migration. For that service, use

the 316 stainless steel Wetted Reference Head.

<sup>2</sup> Vent/Drains are Teflon or PTFE coated for lubricity.

 $^3\,$  Hastelloy  $^{\rm @}\,$  C-276 or UNS N10276

 $^5\,$  Supplied as 316 SS or as Grade CF8M, the casting equivalent of 316 SS.

 $^{\rm 6}\,$  Supplied as indicated or as Grade CW12MW, the casting equivalent of Hastelloy  $^{\rm @}\,\text{C-276}$ 

<sup>11</sup> Except Carbon Steel Heads shall use 316SS Vent/Drain, Plugs & Adapters when required

<sup>1</sup>The PM option is available on all Smartline Pressure Transmitter process wetted parts such as process heads, flanges, bushings and vent plugs except plated carbon steel process heads and flanges. PM option information is also available on diaphragms except STG and STA in-line construction pressure transmitters.

#### FIELD INSTALLABLE REPLACEMENT PARTS

| Description   | Kit Number   | Price  |
|---|--------------|--------|
| Integrally Mounted Basic Indicator Kit (Compatible with all Electronic Modules) | 50049911-501 | Note F |
| Terminal Strip w/Lightning Protection Kit for HART or DE Modules                | 50075472-532 | Note F |
| Terminal Strip w/Lightning Protection Kit for FFB Module                        | 50075472-534 | Note F |
