

## Series 1900

# Series 1900 Compact Low Differential Pressure Switches

**Set Points from 0.07" to 20" W.C. Repetitive Accuracy within 3%**

Series 1910 pressure switch. All pressure and electrical connections and set point adjustments are on one side for easy installation.

Series 1910 switch with conduit enclosure off. Shows electric switch and set point adjustment screw.

The Dwyer-engineered force-motion amplifier increases the leverage of diaphragm movement and results in a switch with excellent sensitivity and repeatability.

**Our most popular series** combines advanced design and precision construction to make these switches able to perform many of the tasks of larger, costlier units. Designed for air conditioning service, they also serve many fluidics, refrigeration, oven and dryer applications. For air and non combustible compatible gases, Series 1900 switches have set points from 0.07 to 20" (1.8 to 508 mm) w.c. Set point adjustment is easy with range screw located inside conduit enclosure. Internal location helps prevent tampering. UL, CE, CSA listed, FM approved and ATEX pending.

## SPECIAL MODELS AND ACCESSORIES

**MANUAL RESET MODEL 1900 MR** includes special snap switch which latches on pressure increase above the setpoint. Switch must be manually reset after pressure drops below the setpoint. To order, change base model to 1900 and add MR suffix after range number. Example: 1900-10-MR. Available on -1, -5, -10 or -20 ranges only. Option is not UL, CSA or FM listed.

**A-399 Duct Pressure Monitor Kit** — For use with standard or manual reset model switches. Includes mounting flange, tubing and adaptors

**A-329 Street Ell** — Brass adapter for applications requiring right angle connections. Two required for differential pressures
