

## Environmental Policy

---

Fluidic recognise our responsibility for the environment and are committed to ensure compliance with all relevant current and future legislation. We seek to minimising the environmental impact of our operations, and continue to operate side by side with our supplier and customer base.

In particular, we will achieve this through our commitment to:

- Reduce the amount of waste produced
- Dispose of waste in an environmentally considerate manner
- Recycle packing materials where appropriate
- Minimise noise from the site
- Avoid the use of environmentally aggressive cleaning chemicals
- Car share where possible, including with suppliers for site visits
- Abide by customer environmental policies when working onsite

Fluidic will foster environmental awareness and understanding in all our employees.

Where practicable, we will provide information and assistance to customers on environmental issues arising from our products and services. Improvement will be continuous and Fluidic will review our environmental impact annually as part of the management review.
