Fluidic Ltd (Glasgow)

Sales Partner for Scotland

Moore Industries-Europe, Inc has appointed Fluidic Ltd of 7 Drumhead PI, Glasgow G32 8EY as a Sales Partner for Scotland.

Fluidic Ltd will use their well-established experience and knowledge in process instrumentation to support and develop sales for Moore Industries products and engineering applications within Scotland.

Fluidic are a supplier of industrial process instrumentation, offering instruments for the measurement of Pressure; Flow; Temperature; Level; Moisture and Analytical analysis. This includes safety critical *SIL* applications and hazardous area *ATEX* applications.

Fluidic also offer modular control systems, dataloggers and wireless instrumentation.

With over 20 years' experience, Fluidic are capable of providing solutions for instrumentation applications including product selection and instrument assemblies where appropriate.

Moore Industries strengthens the product range offered by Fluidic Ltd, especially with respect to signal conditioning, transmitters, trip amplifiers, HART® Interfaces and Remote I/O used in the most demanding industries and process applications.

Moore Industries is a U.S. process instrumentation company, celebrating its '50th Anniversary' in 2018 providing instrumentation to sectors such as the Oil/Gas, Petrochemical, Power and Utility Companies 'World Wide'. The Company has established a reputation in 'Safety Instrumented Systems' and working to the IEC 61508 standard, this combined with decades of experience in Hazardous Area certified products, provides knowledge, competence and confidence in process industry environments.

Fluidic Ltd based in Glasgow are ideally placed to work with Moore Industries to provide much closer sales and technical support in Scotland, providing quicker and more personalized response to existing customers, helping to introduce new products and develop new customers.

Moore Industries-Europe, Inc and Fluidic Ltd (Glasgow) are excited to be working together in Scotland to bring improved support, customer service and grow the business opportunities in the future.
