

## **UKCA Marking following the UK's withdrawal from the EU**

---

Following the United Kingdom's withdrawal from the European Union, any previously CE marked products that will be placed in the UK marketplace from 1st January 2022 will require UKCA marking.

Fluidic are a distributor of instrumentation, however, hold exclusive partnership with a number of principals from the UK, Europe and USA.

I have emailed each of our principals and had a positive response. In some cases, UKCA marking/certification is already available and we can provide with goods. In most cases though, our partners have plans and a process in place to ensure compliance by 1/1/2022.

Anyone with any specific questions, please contact me using the details found on our website, [www.fluidic-ltd.co.uk](http://www.fluidic-ltd.co.uk)
